

Thematic Area 3.

EU policy frames in parliamentary debates (6 hours)

The role of national parliaments (NPs) in the politicization of the EU is discussed in an introductory seminar (Dr. PhD A. Ferreri). The “communicative function” of NPs is described and measured through secondary literature and primary sources.

Instructions to “content-analyse” EU policy frames in parliamentary debates is given, for equipping students to develop a more in-depth practice in the Laboratory focused on data about NPs and the EU (Prof. S. Cavatorto & A. Ferreri).
